1999

# GRADOC

GRAPHIC DOCUMENTATION SYSTEMS IN  
MURAL PAINTING CONSERVATION

## GraDoc Index

The objective of the bibliography was to collect the titles of books, articles and other text references on methods and means of graphic documentation, with a special focus on computer-aided applications. These references are often difficult to locate, partly because they are sometimes included in publications on other topics.

This draft version is at present a work in progress. It is a working document useful for distributing and sharing knowledge.

After the GraDoc seminar, additional references from the papers were included. We apologize for any inadvertent omissions.

For some texts, indications are given on the shelf location in the libraries that were consulted during the research (ICR, ICCROM, Getty Center). Moreover, an indication is provided when the text is available on the Internet. Actually, some texts are exclusively published through this medium.
